

1 DOGE

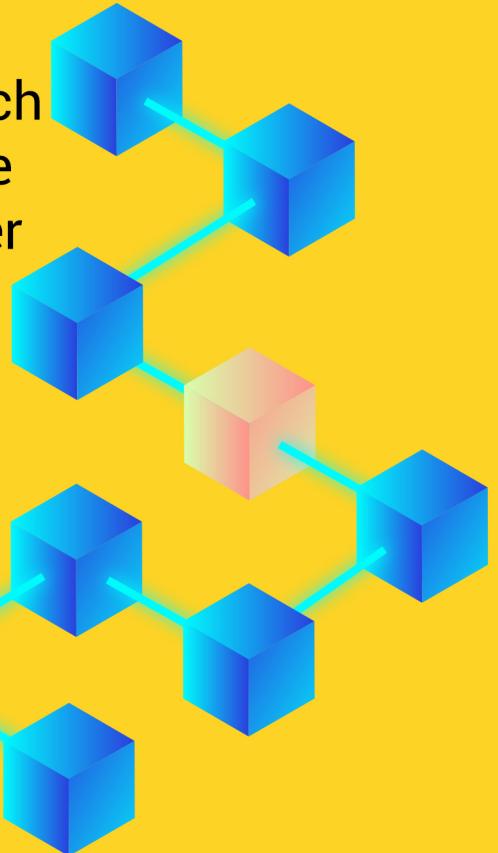

EXECUTIVE SUMMARY

Officially Launched July 2021, 1Doge brings the most sophisticated approach to the Doge clan by showing it's unique improved transaction speeds and super powers.

1Doge's vision is to take the Doge clan to \$1.

Not only is 1Doge highly deflationary, some of its other features include continuous liquidity addition, static reflection , anti-dump protection and several others.

ABOUT 1DOGE FINANCE

- ➡ 1Doge Token is a hyper-deflationary token with a maximum circulating supply of 1 billion (1,000,000,000 1Doge), built on the Binance Smart Chain, 1Doge has both a static reflection and a double burn mechanism with every transaction.
- ➡ A 2% transaction tax is distributed among all holders proportional to each holder's percentage of 1Doge.
- ➡ At Launch, a 6.8% of 1Doge is burned to the burn wallet, this wallet is essentially a holder that collects more tokens over time as transactions occur, there's also a 4% extra tax on all sell transactions, which would be used to buy back and burn tokens weekly, As the circulating supply decreases, the scarcity of the token increases.

- ➡ This inversely proportional relationship constitutes a supply and demand model.
- ➡ There is no limit as to how many tokens can be burnt on the road to \$1. Without a burning limit, holders get to enjoy a never-ending cycle of passive income with positive price pressure!
- ➡ 1Doge was developed by a team of dApp specialists, digital marketers, game developers, charitable leaders and financial experts with the one goal of getting 1Doge to \$1 while adding some sustainability to charity.

1DOGE - THE NEW KID ON THE BLOCK

The newest & most Sophisticated offspring of the Doge clan, 1Doge is coming in with a bang 1Doge is breaking all Jinx and doing what has been impossible for its other siblings- taking the Doge clan to \$1. 1Doge seeks to restore the last dollar hope to its papa Doge by showing its unique improved transaction speeds and super powers.

1DOGE LAND – PLAY TO EARN

We are building a next generation game for Android, iOS and Windows called 1Doge land, where anyone can earn tokens through skilled gameplay and contributions to the ecosystem. Players can battle, collect, raise, and build a land-based kingdom for their pets.

The 1Doge land will be fun above all else while providing an avenue for savvy gamers to earn passive income.

1DOGE EXCITING FEATURES

A Hyper Deflationary Token

A hyper deflationary token with a max supply of 1 billion which will become scarce over time as there is no limit as to how many tokens would be burnt on the journey to \$1.

Static Reflection

2% of each transaction on the 1Doge network would be taken and redistributed back to the holders of 1Doge

Continuous Liquidity Addition

2% of each transaction buy/sell/transfer would be automatically added to the liquidity for Pancake Swap.

Secured by Design

Initial liquidity provided would be locked in unicrypt for 6 months and the contract is audited. The results of the audit would be published to the community..

Anti-Dump Lock & 4% Sell Fee

To curtail an indiscriminate dump of tokens, all sell transactions on the 1Doge network are capped at 0.05% of total supply for every 4hours. Furthermore, an extra 6% charge is applied to all sell transactions, this helps to break whales control. The use of this 6% is explained in the next feature.

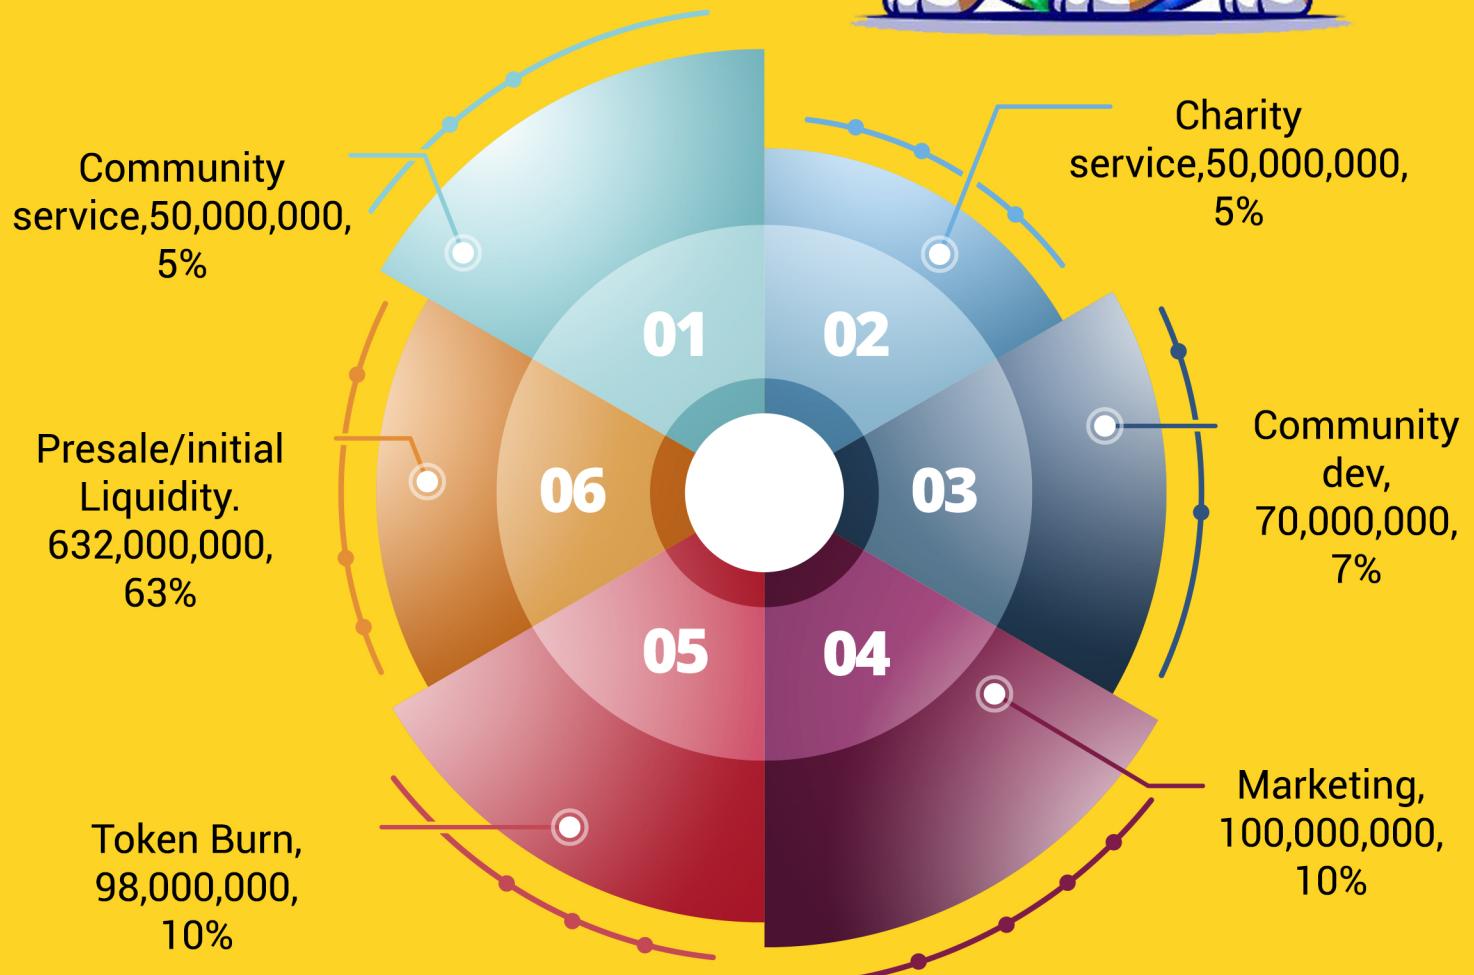

Auto & Weekly Burns (double-burn mechanism)

We will burn 6.8% of the total supply at launch and send it to the dead wallet, there's also a 6% extra tax on all sell transactions (further broken down to 3% will be sent to burn address weekly, the other 3% will be set aside for influencer marketing). Since the dead wallet is also a holder (holds 6.8% of 1Doge), it gets proportional redistribution rewards. But since no one has access to the wallet, the 1Doge tokens are retired from circulation (burned). The burn happens on every transaction and accelerates as the dead wallet gets bigger Forever!
